

# JAVOHIR NUFTILLAYEV

Backend Developer (python/django)

+998990004740

@njr\_oo

Date of birth ..... 30.11.2000

## PROFILE

I am a programming enthusiast with a lot of hands-on experience. I love solving problems and turning ideas into working code. Even though I haven't worked in a company yet, I have spent years learning and building stuff on my own. I'm excited to work on cool projects and show what I can do!

## EDUCATION

❖ PDP Academy ..... Oct 2020 — Feb 2021

Frontend developer

- Proficient in HTML, CSS, and JavaScript for web development.
- Skilled in creating responsive and user-friendly web interfaces.
- Familiar with front-end frameworks like React for building modern web applications.
- Knowledge of version control (e.g., Git) and web performance optimization.

❖ Robotics Lab ..... May 2022 — Nov 2022

Python developer

- Proficient in Python programming.
- Experienced in working with PostgreSQL databases.
- Skilled in web development using Django.
- Proficient in building RESTful APIs with Django REST framework (DRF).
- Familiar with asynchronous programming using asyncio and Telegram bot development with Aiogram.
- Gained practical experience through hands-on coursework and exercises in these technologies.

❖ Najot Ta'lim ..... Feb 2023 — Sep 2023

Backend (python / django)

- In-depth proficiency in Python and Django for backend development.
- Advanced knowledge of PostgreSQL and database management.
- Expertise in asynchronous task queue management using libraries like Celery.
- Mastery of real-time functionality with websockets and Django Channels.
- Experience in deploying complex projects to production environments.

❖ Tashkent University of Information Technologies ..... Sep 2019 — Aug 2023

Software engineer

- Acquired a strong foundation in computer science and software development principles.
- Developed problem-solving and analytical skills through coursework and projects.
- Gained proficiency in programming languages, algorithms, and data structures.

## SKILLS

Python .....	Celery / Redis .....
PostgreSQL .....	Asyncio / Django Channels .....
Aiogram (Bot Telegram) .....	HTML / CSS (SASS) / JAVASCRIPT .....
Django .....	Git / Docker .....
Django Rest Framework / FastAPI .....	

## LANGUAGES

Uzbek (native) .....	Russian (B1) / English (A2) .....
